

# SURFTECH

2023 SURFBOARD DEALER GUIDE

*Jimmy Lopez* Hawaiian Pro Designs

M/SF/T

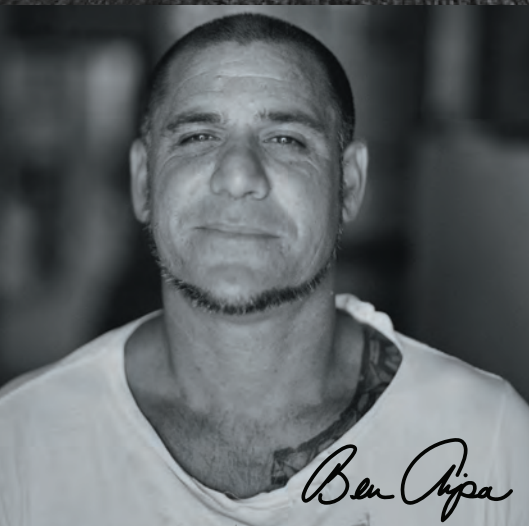

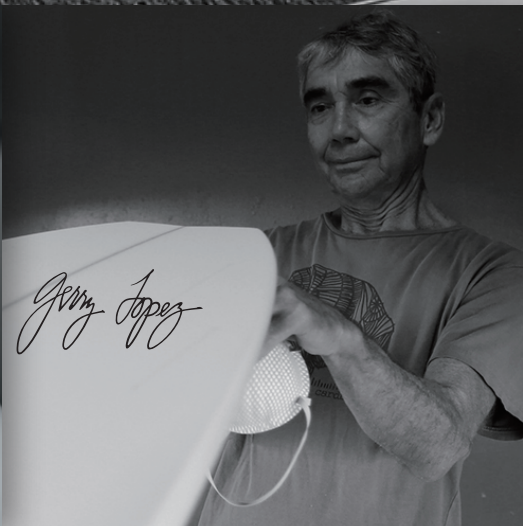

WE ARE ON A MISSION...

**TO DELIVER WORLD-CLASS  
PRODUCTS IN EXCLUSIVE  
CONSTRUCTIONS THAT LAST  
LONGER AND PERFORM BETTER.**

Changing the surfboard industry is no easy task, but that's what we aim to do. Year in and year out, for the last thirty-something years, Surftech has stared down the idea that surfboards can't be made better. In 1989, we started by pioneering the use of advanced composites to manufacture surfboards. We called that construction Tuflite. Decades later, surfboards manufactured in Tuflite and paired with best-in-class designs are desired worldwide by surfers looking for light-weight, durable boards with high-performance levels. It's important to note these new constructions didn't come out of an arbitrary desire to be different but were driven by shapers and surfers demanding increased performance, durability, and availability. Fulfilling these demands, we've expanded our tech offerings and are proud to offer a host of new constructions on top of our proven best-sellers.

## FUSION-E2 CONSTRUCTION

1. **Fused Cell EPS Core (Dual-Core)**  
// Closed cell EPS core provides more response + Flotation
2. **Clear HD-Epoxy Resin**  
// Epoxy resin system with high thermo-mechanical performances
3. **High Quality E-Glass Fiberglass**  
// E-glass has the highest strength to weight ratio available
4. **Full Biax Deck Patch (45° / -45°)**  
// The Biax fiberglass distributes power + protects from dings
5. **UD Carbon Stringer**  
// Distributes power + protects from dings + adds break strength
6. **UD Carbon Tail Patch**  
// Distributes power to the fins + protects from toe/heel dings
7. **FCS II Fin Boxes**  
// Takes just seconds to insert and remove the fins
8. **Exclusive to SHARP EYE Boards**  
// The Fusion-E2 construction is Exclusive to SHARP EYE

## FUSION TRUERIDE CONSTRUCTION

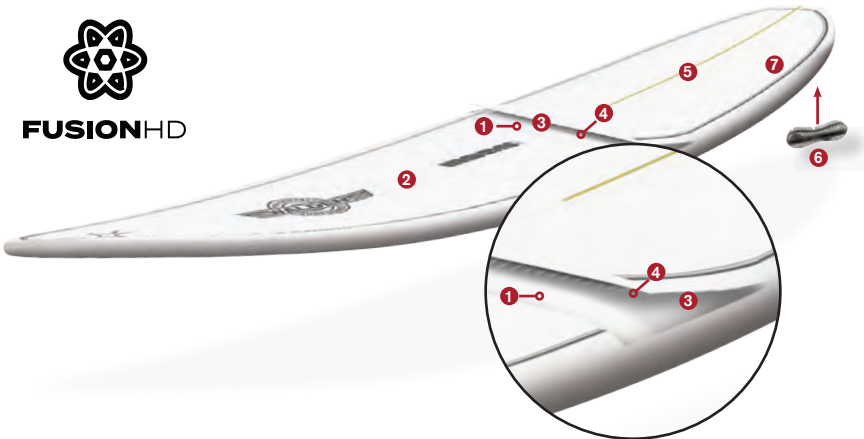

1. **PU Core**  
// High-density polyurethane core for performance and feel
2. **PE Resin**  
// Advanced polyester resin for strength and flex
3. **6oz Fiberglass w/4oz Patch**  
// E-glass has the highest strength-to-weight ratio
4. **Wood-Ply Stringer**  
// Natural wood fibers creates a natural flex and adds break-strength
5. **FCS II Fin Boxes**  
// Takes just seconds to insert and remove the fins
6. **Full Biax Deck Patch (45° / -45°)**  
// Adds strength and durability plus tint creates a unique look
7. **Gloss and Polish Finish**  
// High gloss finish to turn some heads on your paddle out

## FUSION HD CONSTRUCTION

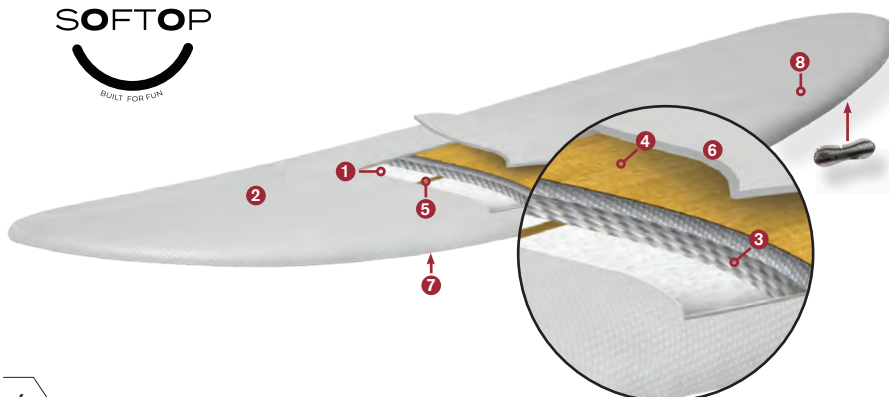

FUSION HD

1. **Fused Cell EPS Core**  
// Closed-cell EPS core provides more response + flotation
2. **Clear HD-Epoxy Resin**  
// Epoxy resin system with high thermo-mechanical performances
3. **High Quality E-Glass Fiberglass**  
// E-glass has the highest strength-to-weight ratio available
4. **Full Biax Deck Patch (45° / -45°)**  
// The Biax fiberglass distributes power + protects from dings
5. **UD Carbon Stringer or Wood Stringer**  
// E-glass has the highest strength-to-weight ratio available
6. **FCS II Fin Boxes**  
// Takes just seconds to insert and remove the fins
7. **Hand-Finished**  
// Machine-shaped, hand-laminated, and hand-finished

## SOFTOP® CUSTOM-PERFORMANCE

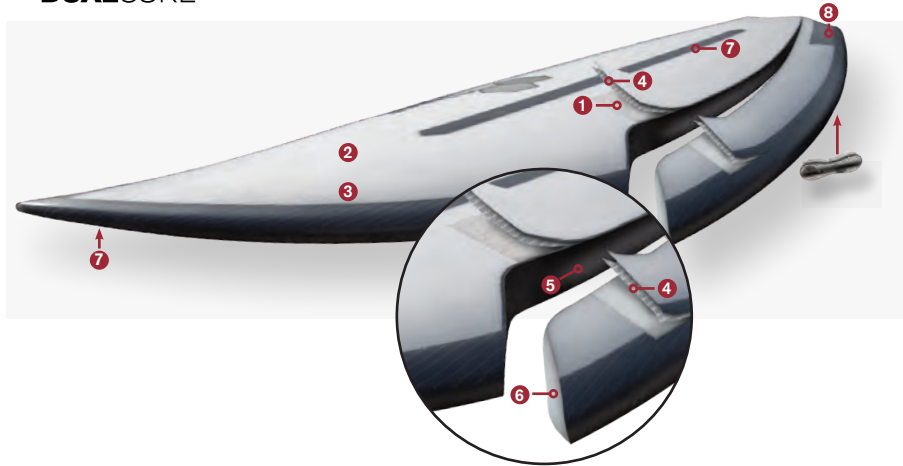

1. **Fused Cell EPS Core**  
// EPS core provides more response + flotation
2. **HD-Epoxy Resin**  
// Epoxy resin with high mechanical performances
3. **2x Layers Fiberglass**  
// E-glass has the highest strength to weight ratio available
4. **Micro-Sandwich Veneer**  
// Wood Veneer creates natural flex + adds break strength
5. **Double Wood Stringers**  
// Stringers add power distribution + adds break strength
6. **Thermal Debossed EVA Deck Pad**  
// The full EVA deck pad gives you traction + adds durability
7. **Hard Fiberglass Bottom**  
// The Fiberglass bottom keeps the contours which = performance
8. **Reinforced Rails**  
// Fiberglass reinforced rails enhances performance + durability

## DUAL-CORE CONSTRUCTION

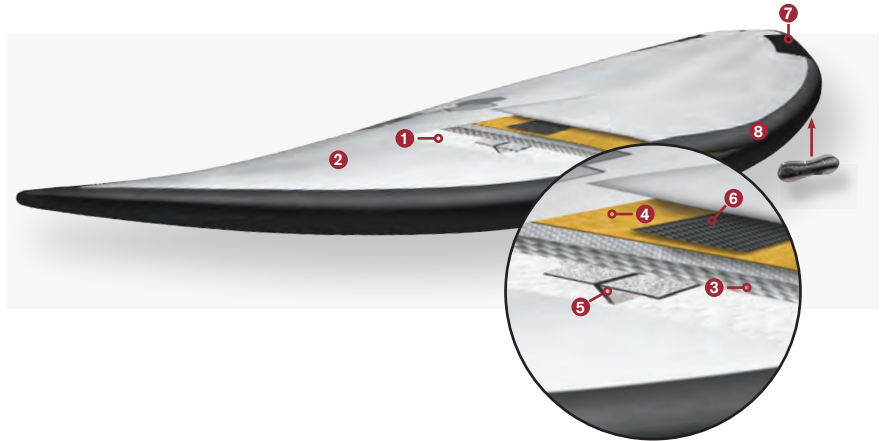

1. **Fused Cell EPS Core (Dual-Core w/PU Rails)**  
// Closed cell EPS core provides more response + Flotation
2. **Clear HD-Epoxy Resin**  
// Epoxy resin system with high thermo-mechanical performances
3. **High Quality E-Glass Fiberglass**  
// E-glass has the highest strength to weight ratio available
4. **Full Biax Deck Patch (45° / -45°)**  
// The Biax fiberglass distributes power + protects from dings
5. **Pop-Flex Stringer (TPU)**  
// TPU adds pop + feel / EVA adds dampening + feel
6. **PU Foam Rail Inserts (Dual-Core w/EPS Center)**  
// PU rails adds drive in and out of turns + swing weight for airs
7. **Carbon Stringer**  
// Distributes power + protects from dings + adds break strength
8. **Carbon Tail Patches**  
// Distributes power to the fins + protects from toe/heel dings
9. **Patented Technology**  
// An exclusive technology by Surftech

## TUFLITE CONSTRUCTION

1. **Fused Cell EPS Core**  
// Closed cell EPS core provides more response + Flotation
2. **GreenPoxy® Resin**  
// The latest innovations in bio-based Epoxy chemistry
3. **2x Layers Fiberglass**  
// E-glass has the highest strength to weight ratio available
4. **Micro-Sandwich Veneer**  
// Wood Veneer creates natural flex + adds break strength
5. **Composite T-Stringer(s)**  
// T-Stringers add power distribution + adds break strength
6. **Carbon Stringer**  
// Distributes power + protects from dings + adds break strength
7. **Carbon Tail Patches**  
// Distributes power + protects from dings + adds break strength
8. **Reinforced Rails**  
// Fiberglass reinforced rails enhances performance + durability
9. **Exclusive Sandwich Technology**  
// Surftech TufLite boards are molded with exclusive methods

If you believe the essence of a thing is it's true value, that kitsch accoutrement is for the birds, and that real creative expression happens on the wave what you need is great design and purist performance. You need Primatek.

### HIGH DENSITY EPS CORE

// Lively response that distributes vibration equally for predictability

### CLEAR HD-EPOXY RESIN

// Epoxy resin system with high thermo-mechanical performance

### 1 X LAYER OF E-GLASS

// Strong and resistant to denting

### 1 X LAYER OF BIAx GLASS

// Gives multi-direction strength while maintaining a lively feel.

NATURAL  
FIBER  
TECHNOLOGY

Natural Fiber Technology is not only made with natural composite reinforcements but its got an amazingly natural feel. Half of the reinforcement by volume on these boards is made from naturally derived fiber such as flax and hemp. The other half is composed of E glass and the whole lot is layered up and vacuum bagged under pressure to maximize the bond and minimize any excess resin, allowing for an incredible strength to weight ratio. The natural fiber not only replaces a good chunk of what would otherwise be fiberglass but also improves dampening for a predictable, natural response. There is an elegance to the simple aesthetic to the layout that is matched only by its ride.

### FUSED CELL EPS CORE (DUAL-CORE W/PU RAILS)

// Closed cell EPS core provides more response + Flotation

### CLEAR HD-EPOXY RESIN

// Epoxy resin with high thermo-mechanical performances

### HIGH QUALITY E-GLASS FIBERGLASS

// E-glass is the industry standard reinforcement as it has the most reliable strength and performance of all surf glass variations.

### NATURAL FIBER REINFORCEMENT

// Renewable, reliable, resilient, and real smooth.

# Ben Aipa

- A LEGACY OF ALOHA -

**"I WAS NEVER WATCHING WHAT OTHER BOARD BUILDERS WERE DOING... I WAS WATCHING THE SURFERS AND THE NATURAL WORLD AROUND ME. THEIR MOVEMENTS SHOWED ME WHAT WAS MISSING... I WAS ALWAYS LOOKING FOR THE NEXT WAVE... THE NEXT MOVE." – Ben Aipa**

Ben Aipa has made a most significant mark in the world of surfing: making the board that fellow Hawaiian Fred Hemmings used to win the World Championship in 1968 and founded his own brand Aipa Surfboards in 1970. Ben invented the doubled-edged swallowtail design in 1972 and followed this with the split-tail design in 1974. Moreover, Ben has served as an informal coach and trainer to such top surfers as Michael Ho, Larry Bertleman, Mark Liddell, Sunny Garcia, Brad Gerlach, and Kalani Robb.

Ben Aipa continued to enter and compete in various surfing contests: He won the grandmasters division of the 1989 United States Surfing Championship and the legends division of the 2000 U.S. Championships. Inducted into the Surfing Hall of Fame in 1992, Ben was named one of the Top Ten Shapers of All-Time by Surfing magazine in 2004.

*Gerry Lopez*

**“WAVES KEEP COMING, THAT’ S THE ONE THING YOU CAN COUNT”–GERRY LOPEZ**

Gerry Lopez grew up in the extraordinary place that was Hawaii in the 1950s and 1960s. He played a part in the shortboard revolution of the late 1960s and early 1970s. He experienced the awe, fear and ultimate satisfaction of finding the tube in the early days at the Pipeline. He traveled for surf throughout the world: to the original surf camp at G-Land, the exotic islands off Sumatra and especially to the magic island of Bali, Indonesia - before it became a popular surf destination. He experienced the beginnings of windsurfing on Maui, the early years of snowboarding and tow-in surfing at Jaws.

Fast forward to today and Gerry Lopez is shaping some truly unique boards that keeps his surfing journey moving forward. This collection of boards represents the quiver that he takes around the world to surf the ultimate breaks.

TO DATE, WALDEN ESTIMATES HE’ S PERSONALLY SHAPED MORE THAN 20,000 BOARDS

Steve Walden shaped his first surfboard in 1961, at age 13, and never looked back. Eight years later, the native Southern Californian opened his first board factory and store in Huntington Beach, then moved to the North Shore of Oahu in 1972, where he made a name for himself as a prolific longboard shaper. While the rest of the surfing world was fixated on short single-fins, Walden continued to faithfully hone his longboard designs. Over the years he shaped for prestigious labels like Lightning Bolt, Local Motion, HIC, and Channel Islands, but it was always his own boards that set him apart. By the early 80s, Walden returned to California where he unveiled his wildly successful Magic Model with its radical rocker, down-turned rails, unique bottom curve & bevels, and super-fast bottom contour. With arguably the most advanced and high performance longboards on the market, Walden was uniquely positioned to capitalize on the resurgence of longboarding in the late 80s and 90s. To date, Walden estimates he’ s personally shaped more than 20,000 boards. These days, when he’ s not mowing foam, Walden is surfing. Though he competed some as a teenager, he returned to contest surfing at the age of 30 and has been a regular on the podium ever since. In fact, Walden still holds the record for the longest noseride in competition history with an epic 25.5-second ride.

Donald Takayama

**“YOU CATCH ONE GOOD WAVE AND IT MAKES YOUR WHOLE DAY – HECK, IT MAKES YOUR WHOLE WEEK.”  
— DONALD TAKAYAMA**

Donald Takayama's legacy is a combination of the world's best boards, best surfers and best waves, making his boards some of the most sought after in the surfing world. Takayama was famous for his progressive designs that combined both traditional and high-performance aspects into every board made. As a result, the best surfers chose his boards to bring their surfing to the next level. Donald Takayama and Surftex worked together for over 20 years before his passing, with a relationship built on trust and a commitment to produce quality products that compliment the designs he so passionately created. That he takes around the world to surf the ultimate breaks.

CHRIS CHONG & DAN WATKINS

## “A RARE COLLECTIVE OF MILDLY DERANGED BUT HIGH-POWERED MISFITS”

Misfit Shapes represents an authentic response to an era of change, a ‘surf’ stemmed movement that allows art, design and individuality to co-exist within a realm more commonly dominated by conformity and observation. We are not bound by a single leader or manifesto, but rather a bold commitment to pushing the limits of this well-oiled machinery of surf. The result is a rare collective of mildly deranged but high-powered misfits, potentially dangerous cultural agitators, and just about every other kind of MAD MIND.

If this is all a bit too real, that’s fine, we can’t please everyone because if we did, we’d end up catching something. But if you are looking to escape the rotating door of normality, please, come inside.
